3 E's of Travel

Educational: One of the top priorities of all our tours is combining education with travel. We feel travel provides a wonderful opportunity to extend the classroom and give students the chance to actually see and touch the things they are taught in school! Georgia Performance Standards are coordinated with each trip.

Exciting: The best part about travel is that it allows many students a once-in-a-lifetime opportunity to visit places that they may never have the chance to visit again. They can see great parts of our world in a safe and educational environment and learn things that will last a lifetime.

Easy: We strive to make the trip-planning process very smooth and easy for everyone involved. We make all the reservations, accept all payments including an online credit card payment system, and have a knowledgeable staff willing and ready to answer your questions!
